

## GMO STATEMENT OF FRENCH AND AMERICAN OAK

GMO studies started about 50 years ago and because oak trees grow naturally and the average age of the logs used for winemaking is about 80 years old, there is not GMO analysis done for French and American white oak used for winemaking.

At Heinrich Alternatives all the oak we use comes from our own mills, so we can be sure of the quality and origin of our supplies.

Sincerely,

A handwritten signature in black ink that reads "David Llodrá". The signature is fluid and cursive.

David Llodrá
